CHESS 2012

Guimarães Portugal

12th World University
Championship

Polish king(s)

Yesterday's competition was lead by the Polish delegation, which keeps winning all the games. Despite this, there are surprises in this World University Championship, namely the Brazilian duo Terao/Martins.

Calm and concentration are the key words to play chess. But there another thing that matters: family suport. Yesterday we could find several family members of the participants.

Eder Leonz, Vice-president of FISU, was at University of Minho sports hall yesterday morning. Leonz show the great appreciation for the Organizing Committee: "everything is going well, do to the commitment an previous experiences of the organization". In his opinion, the main problems of hosting a competition like this one concerned to the accommodation, meals and transportation, but the Organizing Committee "is dealing just fine with this matters".
